

CloudFerro

CloudFerro server rack

206 bricks

11,5 × 11 × 13,5 cm

Engineering starts with the right foundation.

A miniature model inspired by the infrastructure behind Europe's sovereign cloud.

Every CloudFerro cloud region is made up of thousands of precisely engineered components working together to deliver secure, reliable and scalable cloud services for AI, Earth Observation and other mission-critical workloads.

This model is a small tribute to the engineering that powers our infrastructure.

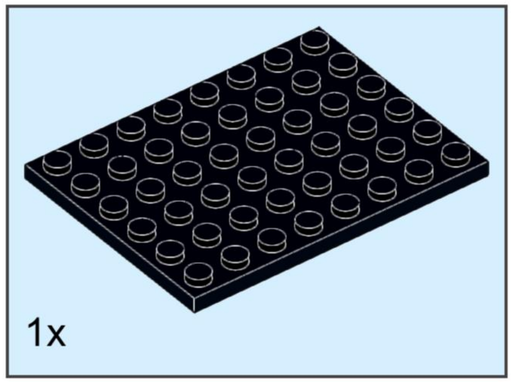

Now it's your turn.

Happy building!

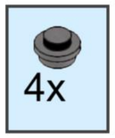

CloudFerro Team
